Amdt. dated March 5, 2004

Reply to Office Action of December 08, 2003

AFTER FINAL EXPEDITED PROCEDURE

This listing of claims replaces all prior versions, and listings of claims in the instant application:

Listing of Claims:

- B1
1. (Currently Amended) A method of entering a new file directory on a computer comprising:
 - displaying a file navigation icon;
 - displaying a file navigation dialogue window in response to a selection of said file navigation icon, wherein said file navigation dialogue window comprises:
 - a plurality of sections comprising:
 - a first section comprising a list of predefined default directories wherein there is no restriction on storage locations of said predefined default directories;
 - a second section comprising at least one user selected directory; and
 - a third section comprising a last used directory, and further wherein each section includes at least one directory; and
 - displaying contents of a directory in response to selection of the directory in said file navigation dialogue window.
 2. (Previously Canceled)
 3. (Previously Amended) The method of Claim 1, wherein the predefined default directories contain a document templates directory.
 4. (Previously Amended) The method of Claim 1, wherein style and content of the file navigation dialogue window are independent of a current document context.

AFTER FINAL EXPEDITED PROCEDURE

5. (Previously Amended) The method of Claim 1, wherein the last used directory contains a latest used directory of a present computer or network session.

6. (Previously Amended) The method of Claim 1, wherein the at least one user selected directory includes a shared user directory accessible to a plurality of users.

7. (Currently Amended) A method of entering a new file directory on a computer comprising:

displaying a file open window including a file navigation icon wherein contents of a first directory are displayed in said file open window;

displaying a file navigation dialogue window in response to a selection of said file navigation icon, wherein said file navigation dialogue window comprises:

a plurality of sections comprising:

a first section comprising a list of predefined default directories wherein there is no restriction on storage locations of said predefined default directories;

a second section comprising at least one user selected directory; and

a third section comprising a last used directory, and further wherein each section includes at least one directory; and

displaying contents of a second directory, selected in said file navigation dialogue window, in said file open window where there is no predefined hierarchical relationship between said first directory and said second directory.

8. (Previously Canceled)

AFTER FINAL EXPEDITED PROCEDURE

9. (Previously Amended) The method of Claim 7, wherein the predefined default directories contain a document templates directory.

10. (Previously Amended) The method of Claim 7, wherein style and content of the file navigation dialogue window are independent of a current document context.

B¹
11. (Previously Amended) The method of Claim 7, wherein the last used directory contains a latest used directory of a present computer or network session.

12. (Previously Amended) The method of Claim 7, wherein at least one user selected directory is a shared user directory accessible to a plurality of users.

13. (Currently amended) A computer graphic user interface comprising:
a file open window further comprising:
a directory content window; and
a file navigation icon wherein upon a first action on said file navigation icon, contents of a directory are displayed in said directory content window in response to the first action; and upon a second action on said file navigation icon, a file navigation dialogue window is displayed.

14. (Original) The computer graphic user interface of Claim 13 wherein said file navigation dialogue window further comprises:

a first section comprising a list of predefined default directories;

AFTER FINAL EXPEDITED PROCEDURE

a second section comprising at least one user selected directory; and
a third section comprising a last used directory.

15. (Previously Amended) The computer graphic user interface of Claim 14, wherein the predefined default directories contain a document templates directory.

B' 16. (Previously Amended) The computer graphic user interface of Claim 14, wherein style and content of the file navigation dialogue window are independent of a current document context.

17. (Previously Amended) The computer graphic user interface of Claim 14, wherein the last used directory contains a latest used directory of a present computer or network session.

18. (Previously Amended) The computer graphic user interface of Claim 14, wherein the at least one user selected directory is a shared user directory accessible to a plurality of users.

19. (Currently Amended) A computer program product for entering a new file directory having program code adapted for:

displaying a file navigation icon;

displaying a file navigation dialogue window in response to a selection of said file navigation icon, wherein said file navigation dialogue window comprises:

a plurality of sections comprising:

a first section comprising a list of predefined default directories wherein there is no restriction on storage locations of said predefined default directories;

AFTER FINAL EXPEDITED PROCEDURE

a second section comprising at least one user selected directory; and

a third section comprising a last used directory, and further wherein each section includes at least one directory; and

displaying contents of a directory in response to selection of the directory in said file navigation dialogue window.

20. (Previously Canceled)

6 21. (Currently Amended) A computer program product for entering a new file directory having program code adapted for: displaying a file open window including a file navigation icon wherein contents of a first directory are displayed in said file open window;

displaying a file navigation dialogue window in response to a selection of said file navigation icon, wherein said file navigation dialogue window comprises:

a plurality of sections comprising:

a first section comprising a list of predefined default directories wherein there is no restriction on storage locations of said predefined default directories;

a second section comprising at least one user selected directory; and

a third section comprising a last used directory, and further wherein each section includes at least one directory; and

displaying contents of a second directory, selected in said file navigation dialogue window, in said file open window where there is no predefined hierarchical relationship between said first directory and said second directory.

AFTER FINAL EXPEDITED PROCEDURE

22. (Previously Canceled).

23. (Currently Amended) An apparatus comprising:
a processor; and
a memory coupled to said processor, and storing
instructions for a method of entering a new file directory
wherein upon execution of said instructions on said
processor, said method comprises:

displaying a file navigation icon;

displaying a file navigation dialogue window in
response to a selection of said file navigation icon,
wherein said file navigation dialogue window
comprises:

a plurality of sections comprising:

a first section comprising a list of
predefined default directories wherein
there is no restriction on storage
locations of said predefined default
directories;

a second section comprising at least
one user selected directory; and

a third section comprising a last used
directory, and further wherein each section
includes at least one directory; and

displaying contents of a directory in response
to selection of the directory in said file navigation
dialogue window.

24. (Previously Canceled)
